## Change Password

First it check username, if username is validate password input will display

The screenshot shows a web application interface with a top navigation bar containing 'Event Management', 'Home', 'Employees', and a user profile icon. A modal dialog titled 'Change Password' is open. It features a 'UserName' input field with the text 'admin' and a blue button labeled 'check userName'.

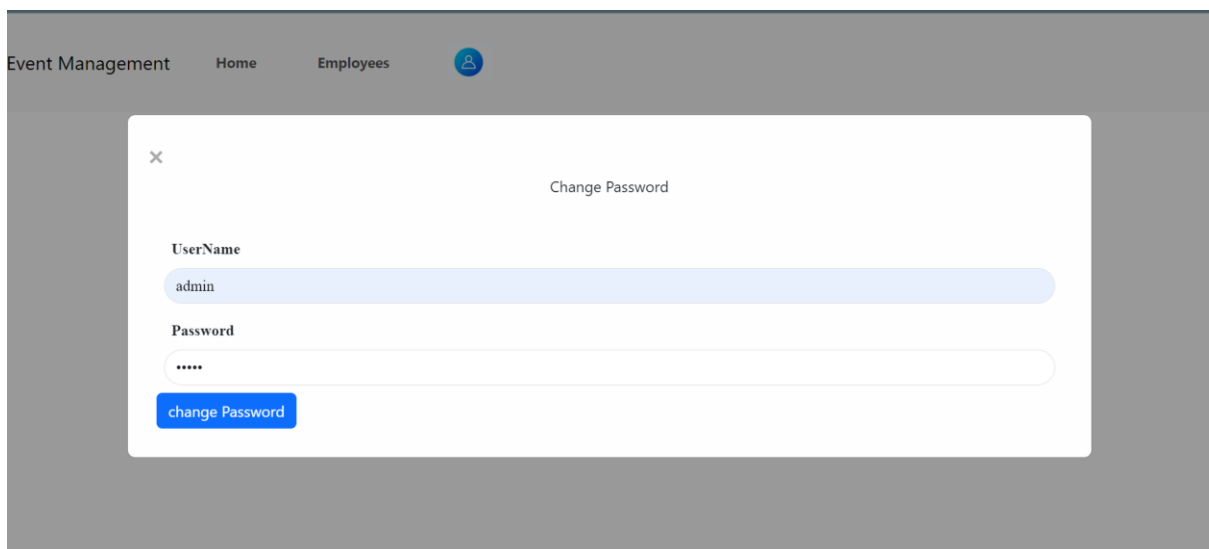

The screenshot shows the same web application interface. The 'Change Password' modal dialog is open, and the 'check userName' button has been replaced by a blue button labeled 'change Password'. The 'Password' input field is now visible below the 'UserName' field.

## Before change Password

```
dbjson > [ ] user > {} 0 > # id
1 {
2   "user": [
3     {
4       "username": "admin",
5       "password": "1234",
6       "id": 1
7     }
8   ],
9   "employees": [
10    {
11      "first_name": "Sachin",
12      "last_name": "tendulkar",
13      "email": "SachinTendulkar@gmail.com",
14      "id": 1
15    },
16    {
17      "first_name": "Dhoni",
18      "last_name": "Me"
19    }
20  ]
21 }
```

## When change password clicked
